Web Developer

OBJECTIVE

I am a solution-driven Web-Developer that excels in highly collaborative work environments, finds solutions to challenges and is focused on customer satisfaction. Proven experience developing consumer-focused web sites using HTML, CSS, JavaScript, React, Redux, MongoDB/PostgreSQL, Node and Express. Experience meeting the highest standards for web design, user experience, best practices, usability, and speed. Responding to challenges by developing solutions and building web applications aligned to customer's needs. Translating solutions into code and working across many different APIs, third-party integrations and databases.

Work experience

August, 2019 -
November, 2019

Intern

[HNG Internship 6.0](#)

A 3 months Internship organized by hotels.ng and sponsored by flutterwave that involves developing interns through collaboration, project management and also time management. I was team lead for two projects during the internship and I learnt valuable skills that have made me a better developer.

- I led a team into building a file sharing application, xshare.ga (built with MongoDB. Express, React/Redux, Node) that converts files, uploads them into a server and then converts them into sharable links. These links can be shared via email, socials (facebook, twitter, whatsapp) or it can just be copied directly and pasted as you see fit.
- I led a team into building a finance tracker application (built with MongoDB. Express, React/Redux, Node) that helps keep track of the user's expenses <https://financetracker-triptolemus.herokuapp.com>.
- I was part of the team that built trim.ng (built with MongoDB. Express, Node and EJS), an application that shortens long links into short / customizable links.

Education

2010 - 2015

BSC, COMPUTER SCIENCE (2nd Class Upper's Division)

[Babcock University, Ilishan Remo, Ogun State, Nigeria](#)

Project Topic: Babcock University Admission Management System

Feb, 2019 - June, 2019 The Web Developer Bootcamp by Colt Steele

Skills

Frameworks/Libraries

React, Redux ,Bootstrap, Semantic UI, Material UI, NodeJs, NextJs, ExpressJs, Tachyons

Tools

NPM, GIT, GITHUB, Trello, Pivotal Tracker, Jira, Figma, Postman

Databases

MongoDB,PostgreSQL

Languages

Javascript

Others

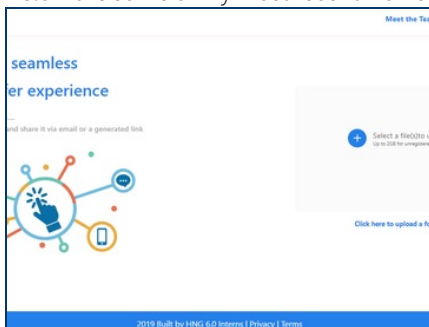

TDD, OOP, Functional Programming, ES6+, Troubleshooting, Debugging

Why you should hire me

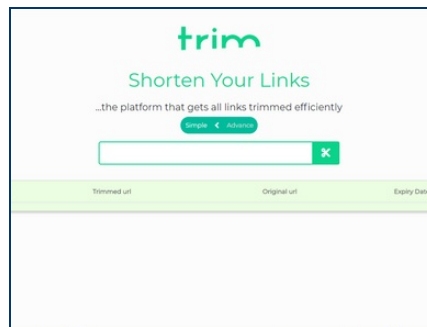

I am smart, eager to work and develop into a better programmer. I have the passion and drive to succeed in any position i'm in. I am very reliable and trustworthy, a team player and focused on client's satisfaction above all. I am a critical thinker, i love solving problems and i want an avenue to grow.
